Website Registration Guide

This guide walks you through the complete process of registering a new website on the platform. Follow each step in order — each entity you create builds on the previous one.

Overview

Registering a website requires completing **4 setup stages** in this exact sequence:

```
1. Create a DMO  →  2. Create an Authority  →  3. Create / Select Campaigns  →  4. Configure Website
```

Navigate to **Website Config** in the sidebar to access all four stages.

Stage 1 — Create a DMO

Sidebar: Website Config > DMOs

A DMO (Destination Management Organization) is the top-level entity. Everything else belongs to a DMO.

Steps

1. Click **Create DMO**.
2. Fill in the **General** tab:

Field	Required	Notes
Name	Yes	Max 80 characters
Description	No	Max 300 characters
Logo	No	Upload a file or paste an image URL
Active	—	Enabled by default

3. *(Optional)* Switch to the **Boundary** tab to draw a geographic area on the map. You can set:
   - A polygon boundary (region outline)
   - A center point (coordinates)
4. Click **Save**.

> *Once saved, the DMO name cannot be changed. Choose it carefully.*

Stage 2 — Create an Authority

Sidebar: Website Config > Authorities

An Authority is a subdivision within a DMO (e.g., a city, district, or regional body). You must have at least one DMO before creating an Authority.

Steps

1. The page shows tabs for each DMO. Select the DMO you created in Stage 1, or use the URL parameter `?dmoId={id}`.
2. Click **Create Authority**.
3. Fill in the **General** tab:

Field	Required	Notes
Name	Yes	Max 80 characters
DMO	Yes	Select the parent DMO — cannot be changed later
Description	No	Max 300 characters
Logo	No	Upload a file or paste an image URL
Active	—	Enabled by default

4. *(Optional)* Switch to the **Boundary** tab to define the authority's geographic area on the map.
5. Click **Save**.

> *The parent DMO is locked after the authority is created. Make sure you select the correct one.*

Stage 3 — Campaigns

Sidebar: Website Config > Campaigns

Campaigns are promotional entities you can create directly from this page or browse existing ones to assign to your website in the next stage.

Creating a new campaign

Click **Create Campaign** and fill in the details. Each campaign has a name, type, code, and optional description and logo.

What to note before moving on

- Browse campaigns by name, type, and code (shown as `#CODE`).
- Decide which campaigns you want to assign to your website:
  - **Primary Campaign** — the main campaign for the website (one only).
  - **Additional Campaigns** — supplementary campaigns (multiple allowed).

You will select these in Step 2 of the Website Configuration form.

Stage 4 — Configure the Website

Sidebar: Website Config > Websites

This is a **10-step form**. Complete the steps in order. Required fields are marked with `*`.

Step 1 — General Settings

Field	Required	Notes
Website Name (English)	Yes	
Website Name (Hebrew)	Yes	
Website Name (Arabic)	Yes	
Slogan (English)	Yes	
Slogan (Hebrew)	Yes	
Slogan (Arabic)	Yes	
Website URL	Yes	Full URL including `https://`
Identifier ID	Yes	Unique slug — cannot be changed after creation
Purpose	No	Marketplace / Traveling / Other (default: Marketplace)
GA Property ID	No	Google Analytics property ID
Platform Charge	No	Percentage value (0–100)

Step 2 — Campaigns

Assign campaigns you identified in Stage 3.

Field	Notes
Primary Campaign	Select one campaign as the main campaign
Additional Campaigns	Select one or more secondary campaigns

Click a campaign card to select it. A checkmark appears on selected items.

Step 3 — Branding & Media

Upload visual assets for the website.

Field	Accepted Formats	Notes
Logo	PNG, SVG, WebP	Main website logo
Favicon	ICO, PNG	Browser tab icon
Special Symbol	PNG, SVG, WebP	Optional decorative symbol
Background Image	ICO, PNG	Homepage background

Each field supports drag-and-drop upload or URL input. Upload progress is shown inline.

Step 4 — Homepage Videos

Upload videos shown on the homepage.

Field	Notes
Desktop Videos	Video files + optional thumbnails
Mobile Videos	Video files + optional thumbnails

You can upload multiple videos per device type and set each one as active or inactive.

Step 5 — Theme & Appearance

Customize the visual style of the website.

Field	Default	Notes
Primary Color	`#0d9488`	Hex color or color picker
Secondary Color	`#6366f1`	Hex color or color picker
Background Color	`#ffffff`	Hex color or color picker
Font Family	Inter	Inter, Roboto, Open Sans, Poppins, Montserrat, Lato, Nunito, Raleway
Font Source URL	—	URL to a custom font (optional)
Button Style	—	Rounded (pill), Square, or Custom radius (0–24px)
Dark Mode	Off	Toggle to enable dark mode

Step 6 — Social Media

Field	Notes
Facebook URL	Full page URL
Instagram URL	Full profile URL
Twitter / X URL	Full profile URL
YouTube URL	Channel URL
LinkedIn URL	Company page URL
TikTok URL	Profile URL
Show Social Icons	Toggle on/off
Open Links in New Tab	Toggle on/off

All fields are optional.

Step 7 — Contact Details

Field	Required	Notes

Phone Number	Yes	
Email	Yes	
WhatsApp Number	No	
Support Email	No	
Physical Address	No	
Google Maps Embed URL	No	
WhatsApp Message (EN)	No	Default message template
WhatsApp Message (HE)	No	Default message template
WhatsApp Message (AR)	No	Default message template
Enable Click-to-Call	—	Toggle
Enable WhatsApp Chat	—	Toggle

Step 8 — SEO & Meta Tags

Field	Required	Notes
Meta Title	Yes	Max 60 characters
Meta Description	No	
Meta Keywords	No	
OG Title	No	Social sharing title
OG Description	No	Social sharing description
OG Image	No	Image shown when shared on social media
Twitter Card Title	No	
Twitter Card Description	No	
Twitter Card Image	No	
Canonical URL	No	
Robots.txt	No	Default: `User-agent: * / Allow: /`
Sitemap URL	No	

Step 9 — Analytics & Tracking

Field	Format	Notes
Google Analytics ID	`G-XXXXXXXXXX`	

Google Tag Manager ID	`GTM-XXXXXXX`	
Facebook Pixel ID	—	
Header Scripts	—	Custom code injected in `<head>`
Footer Scripts	—	Custom code injected in `<footer>`

All fields are optional.

Step 10 — Localization

Field	Options
Default Language	English, Hebrew, Arabic, French, Spanish, German, Italian, Portuguese, Russian, Chinese, Japanese
Timezone	UTC, America/New_York, America/Los_Angeles, Europe/London, Europe/Paris, Asia/Dubai, Asia/Jerusalem, Asia/Tokyo, Asia/Shanghai, Australia/Sydney
Currency	USD, EUR, GBP, ILS, AED, SAR, JPY, CNY, CAD, AUD
Date Format	MM/DD/YYYY, DD/MM/YYYY, YYYY-MM-DD, DD-MM-YYYY, MMM DD YYYY
Multi-language Support	Toggle on/off

Completion Checklist

Use this checklist before going live:

- ☐ DMO created with name and logo
- ☐ Authority created and linked to the correct DMO
- ☐ Campaigns reviewed and target campaigns noted
- ☐ Website name and slogan provided in all three languages (EN, HE, AR)
- ☐ Website URL and Identifier ID set
- ☐ Primary campaign assigned
- ☐ Logo, favicon, and background image uploaded
- ☐ Homepage videos uploaded (desktop and mobile)
- ☐ Brand colors and font selected
- ☐ Phone number and email filled in (required)
- ☐ Meta title filled in (required for SEO)
- ☐ Analytics IDs entered (if applicable)
- ☐ Default language, timezone, and currency set

Quick Reference — Required Fields

Stage	Required Fields

DMO	Name
Authority	Name, Parent DMO
Website — Step 1	Name (×3 languages), Slogan (×3 languages), Website URL, Identifier ID
Website — Step 7	Phone Number, Email
Website — Step 8	Meta Title

Notes

- **Identifier ID** is permanent once a website is created. Plan this value carefully (e.g., use a short, URL-safe slug).
- **DMO** and **Authority parent** cannot be reassigned after creation.
- The website form tracks an overall **completion score** based on how many fields are filled. Aim for 100% before launch.
- A website can be deactivated from the Websites list page without deleting it.
